DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 29 December 2003 have been fully considered but they are not persuasive.

Applicant argument regarding any disclosure of a "combined sensor shell for housing current and voltage sensors or a configuration plug for configuring voltage sensors in either a wye or a delta configuration. Examiner like to point out the cited reference (Engel et al.) clearly discloses in figure 1 that current and voltage sensors are part of the circuit breaker the are mounted in same plastic housing of breaker. Further the independent claims 1 and 13 do not claim the wye and delta configuration.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claim 1-9,13-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Engel et al. (U.S. Patent # 5,600,527).

Application/Control Number: 10/063,097

Art Unit: 2838

Engel et al. discloses claimed invention a combine current and voltage sensor (figure 1) for sensing current and voltage in a first load strap of a circuit breaker (figure 1, item 25A-25C), the combined current and voltage sensor (figure 1, item 7A, 7B, 7C) comprising: a combined sensor shell (figure 1, item 11); a current sensor located in the combine sensor shell, the current sensor disposed proximate to the first load strap; a first load strap; a first voltage sensor located in the combine sensor shell, the first voltage sensor disposed proximate to the first load strap.

In regards to claims 2-9 and 14-21, Engel et al. also discloses claimed limitation such as "second and third voltage sensors, the configuration plug, a neutral line, an electronic trip unit, and a transformer.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsko (U.S. Patent # 5,936,817) in combination with Peterson et al. (U.S. Patent # 5,420,799). Matsko et al. disclose the claimed invention (figure 2), including voltage sensor, current sensors, transformers, and neutral. However Matsko et al. does not disclose the utilization of the technique for a voltage divider. Peterson et al. teaches the utilization of the similar technique for a voltage divider (figure 14A). It would have been obvious to one having an ordinary skill in the art at the time the

Application/Control Number: 10/063,097

Art Unit: 2838

invention was made to modify Matsko et al.'s circuit breaker by utilizing the technique taught by Peterson et al. for the purpose of reducing energy consumption.

Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rajnikant B Patel whose telephone number is 571-272-2082. The examiner can normally be reached on 6.30-5.00; m-f.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Sherry can be reached on 703-308-1680. The fax phone number for the organization where this application or proceeding is assigned is 571-272-2084.
